GVenue · GV RRHH

SALES DOSSIER · STAFF RECORDS

Your staff records, done properly

Who works, how much they earn, who showed up and how much you paid them that night. With history: a raise today doesn't rewrite what last month cost you.

RECORD PER PERSON | PAY WITH HISTORY | TIME CLOCK | ABSENCES WITH APPROVAL

Prepared for
GVenue.com.ar

ARGENTINA

NOVEMBER 2026 · V1 · GVENUE.COM.AR

01 The idea, in four lines

Who works, how much they earn, who showed up and how much you paid them that night — with **history**. A raise you agree on today applies from today: last month still costs what it cost. It's proper staff records, instead of a message group and the manager's memory.

> **The real problem it solves**
>
> A night's staff **isn't a stable payroll**: there are regulars, there are temps and there's someone who came in to cover two hours. That's why almost nobody keeps it in writing, and on Monday you have to piece together from memory who worked on Saturday and how much they were paid. That's exactly the number that doesn't add up later when you want to know what the party cost you.

Entered once

Details, your own employee number, position, working days and schedule. The same person can't be entered twice.

And then the night closes itself

You confirm who showed up, with the money already filled in as agreed. You only touch what went off the agreement — and that's recorded with its reason.

02 What you won't find anywhere else

✓ **All your people on one screen: People**

A list and a profile per person in three parts: their **details** (entered once, valid for everything), how they **access the system** (position, scanner, panel profile: Events, Promoters, Cashier, Manager…) and the **employment** side (employee number, pay, days and absences). You add someone in one step, ask them by WhatsApp for the details they're missing, and every change asks you to confirm before it's applied.

✓ **Pay has a history, so the past isn't rewritten**

It's the piece no spreadsheet has. In a spreadsheet, giving someone a raise changes **every** night that already happened: suddenly the July party cost you what it costs today, and any month-to-month comparison is lying. Here the agreed pay is **dated**: the raise applies from its date and what a night last month cost is still what that night cost.

✓ **What you overpaid stops being invisible**

If one night you gave someone extra for covering two stations, that's usually recorded nowhere: it comes out of the till and disappears. Here **what you actually paid** is recorded, with the reason next to it, and the reports show you the deviations from what was agreed. It's the difference between knowing what your staff costs you and guessing.

✓ **They clock in with their ID, and nobody clocks out**

They clock in on arrival by typing their ID number on a computer at the venue, and the screen tells them which station to go to that night. The clock-out is set by the end of the event: nobody has to remember to clock out at six in the morning, which is when no time clock really gets used.

✓ **Absences are approved and deducted on their own**

Vacation, days off or sick leave are requested and approved from the panel. Once approved, **that night stops being paid on its own** — no need to remember to take it out of payroll later.

✓ **Itemized reports, not a total**

By person, by position, by month and by payment method. Plus the deviations from what was agreed and absenteeism. With that you know precisely what your staff costs you per night, per position and per month, which is the number that decides whether a party gets repeated.

What this module is NOT

It isn't a payroll processing system and doesn't replace your accountant: it doesn't issue pay slips or calculate social security contributions. It's the venue's **operational staff records** — who works, what you agreed with each one, who showed up and how much you paid. And it isn't the same as the «Staff with P&L» included in the Suite Pro, which handles pay per night and the final balance: this is the full record, with pay history, clock-in, absences and reports, and it's **hired separately**.

03 Why GVenue, and not someone else

Every system in this business promises the same things. These six are the ones that, in practice, change how it feels to use it — and the ones you can check for yourself before you sign anything.

1 **Truly modular: you pay only for what you use**

GVenue isn't sold as a single license with fifty screens you'll never open. Each module is hired on its own and switched off on its own. If next month you don't use GV RRHH, you drop it and it stops being billed. There's no «plan» forcing you to pay for what you don't need to get to what you do.

2 **Our prices are published**

Go to **gvenue.com.ar/armar**, tick what you need and see the total, today, without leaving your phone number or booking a demo. In the survey we did of the Argentine market (July 2026), no competitor publishes its prices: you have to ask for a consultation to find out what it costs. We'd rather you do the math before you talk to us.

3 **The venue's data belongs to the venue**

Your customer base, your sales and your history are yours: you export them to Excel whenever you want, without asking permission or paying extra to «release» them. And if one day you want to move the whole system to a server of your own, that version exists — you're never locked in.

4 **You talk directly to the developer**

No help desk, no middlemen: you talk to the person who builds the system, who gets your request the first time and solves it in the code. A specific request that doesn't exist today is quoted by the hour and, if it helps other venues, it joins the catalog for everyone. Several of the features published today were born exactly like that, requested by a client in production.

5 **Every module has its manual and its videos**

We don't leave you with an afternoon of training and good luck. Every module has a PDF manual with real screenshots of the system, plus video tutorials — in Spanish, with the manuals being translated into English one by one — so when someone new joins the team they learn it on their own, during their shift, without you having to explain it all over again.

6 **Anywhere in the world, in the language you need**

It's a cloud system: it works from any country, on a PC, a tablet or a phone. Today it speaks Spanish and English, and another language can be added on request. And it's 100% configurable: hours, names, permissions, prices and screens adapt to the way each client works, without switching systems.

> **And one that isn't a feature**
>
> We publish our **policies** —what we do and don't do with your data and your money— at gvenue.com.ar/politicas. They're written to be read, not to cover ourselves. And we work under a quality management system: **GVenue is going through internal audits of its Quality Management System, ahead of the external audit for its upcoming ISO 9001:2015 certification**.

04 The money, crystal clear

> **GVenue doesn't touch a single peso of what goes through this module**
>
> Our billing is **exclusively on ticket sales**. What you charge at the bar, at the cloakroom and for any extra at the venue is **100% the venue's**: it doesn't go through any account of ours, it carries no commission and we don't bill it. GV RRHH is paid with a flat monthly fee and nothing else — sell a thousand drinks or ten thousand, the fee is the same.

How you take payment at the counter

That money doesn't go through us: it goes wherever you say. The system records it so your register closes, in this order of real-world use:

1. **Cash**
   Most of what's charged at the venue. It's entered with the sale, and the closing cash count checks it against what's left in the register.

2. **Bank transfer**
   The customer transfers to your account and the cashier marks the sale as a transfer. The money goes straight to your bank, with no intermediary.

3. **Crypto (USDT)**
   Same approach, for the customers who pay that way.

4. **Card, with your card terminal**
   Your terminal is linked to the system: the cashier charges on your terminal and the sale confirms itself when the terminal approves it —no «paid» marked by hand, no mismatches—. That card money is credited through your own account, on your terminal's timelines; we don't step in on that money.

> **SOON What's coming, and isn't here yet**
>
> We're working on **GV-Posnet**: GVenue running **inside** the card terminal, so the cashier can do everything from the device. It's **in development** — it isn't something you can hire today and it isn't included in any price in this dossier. We mention it because it's where the module is headed, not because it's here.

The monthly fee

- **It's billed one month in advance.** You get a grace period of 10 to 15 days and staggered notices before any restriction — you'll never find the system switched off in the middle of an event over an invoice.
- **The prices in this dossier are the published ones.** Any special volume terms are **agreed by contract**, case by case: there's no automatic discount and no hidden price list.
- The fee is monthly, in US dollars, and it's invoiced in Argentine pesos at the exchange rate of the day.

05 The price

🪪 GV RRHH · YOUR STAFF RECORDS

USD 25/mo

A file for every person who works at your venue: details, staff number, role, days and hours. The agreed pay keeps its change history, so a raise today doesn't rewrite what a night last month cost you. Each night you record what you actually paid — if you gave someone extra for covering two posts, it's logged with the reason. Staff clock in with their ID number on a computer at the venue, and the event's end sets the clock-out. Requests for holidays, days off or sick leave are approved from the panel and deduct automatically. Reports broken down by person, role, month and payment method.

🎟️ **If you sell your tickets with GVenue, your monthly fee drops 50%**

The whole system is modular: you pay the monthly fee for the modules you use. **If you sell your tickets with GVenue and go over 300 paid tickets a month of at least ARS 10,000 each** (average of the last 3 months; complimentary tickets and invitations don't count), the monthly fee for your modules drops **50%**.

* Dollar amounts are reference values for the fully functional system with onboarding done by the client. In Argentina, invoicing and payment are in pesos at the current reference dollar rate. If anything additional has to be configured or developed, the price is agreed separately. Licenses outside Argentina are billed in USD via USDT (reference values, billed in USDT for licenses outside Argentina).

What other modules it adds up with

There are two bundles, and there will always be just two: there's no ladder of plans with ever-longer names.

BUNDLE	WHAT IT BRINGS TOGETHER	PRICE
🏢 **Operations Suite**	The basic operation: core Bar + cash till + basic reports + Access (list accreditation + blocklist) + basic staff (onboarding, schedules, attendance, handovers — without the payroll part). Pro add-ons are added separately or with the Suite Pro	USD 119/mo
🏢 ⭐ **Suite Pro**	The Suite + Staff with P&L (per-night pay and final balance) + Parking + VIP Sector + Cloakroom + the full Barra Pro bundle (Stock, Recipes, Promos, AI Photos, Pro Report). Includes 🧾 E-invoicing for 1 CUIT (in testing). Kiosk, card terminal, Concierge, GV Cash, Merch and Consignment are hired separately	USD 199/mo

If a module already comes inside the bundle you hire, **it isn't charged separately**. And when a bundle grows with a new feature, whoever already pays for it gets it without a price increase.

06 Who made it?

GVenue is an Argentine system, made by **Gozzi.dev**: a software development studio based in Mar del Plata that works with each client directly.

Javier Gozzi · founder of GVenue and Gozzi.dev

He has been developing software since 2009. He was Technical Manager at El Divino Buenos Aires and Complejo Sobremonte (Mar del Plata), and then he wrote the system for the night: GVenue is designed from inside the club, with a packed door, a bar running out of stock and a register that doesn't add up. At GVenue he handles the product, the architecture, the backend, the infrastructure and the design.

linkedin.com/in/javgozzi

gvenue.com.ar/quienes-somos

Gozzi.dev's work

- **GVenue** · modular system for venues and events
- **RespondIA** · AI assistant to serve and sell on the web and WhatsApp
- **Gozzi Hosting** · Argentine hosting on its own infrastructure
- **MG Muebles** and **Caruso Centro MDQ** · commercial websites
- **Alisaplack** · drywall construction
- **Porsche Design Tower Miami** · the building's website, for Dezer Development

Why hire GVenue

1. **Made by people who know the night**
   It isn't generic software adapted to a nightclub: it was born from the technical management of nightlife venues, and that's why GV RRHH solves real problems of a Saturday in the small hours.

2. **Direct support from the person who writes it**
   No help desk, no tickets: you talk to the person who writes the code.

3. **Made in Argentina, with published prices**
   Prices in US dollars in plain sight at gvenue.com.ar/armar, and support from Argentina (UTC−3).

4. **Truly modular**
   You hire only what you use —tickets, door, bar, tables, courts, music— and each module is switched on or off separately.

5. **100% configurable, and custom-built if something's missing**
   Hours, prices, rules and permissions are changed from the panel; what doesn't exist gets developed. Behind it there's a real studio, with a name and a face.

07 Next steps

You hire it yourself, in five minutes

Go to **gvenue.com.ar/armar**, tick GV RRHH and whatever else you need most, and you'll see the monthly total right there. That same screen generates the contract with the detail of what you hired — no fine print and no salesperson breathing down your neck.

And before the fee starts running, you get a **15-day trial** to load your data and test it with your own information. If during that time you decide it's not for you, you haven't paid anything.

GVENUE.COM.AR/MODULOS/GV-RRHH.HTML?LANG=EN

Shall we see it working with your numbers?

Half an hour on a video call, with your real menu or schedule loaded, is worth more than any presentation. Write to us and we'll set it up.
